

Happy Birthday

We take joy in" your birth

Celebrate our knowing you

Sincerely wish you happiness

For it is ours together

We all place our love in you

Through you, in each other

We are always with you

One mind, one body and one love

In unity we find our strength

Alone, fear and weakness

We extend to you our hand

Reach out and grasp it

Together with you we are whole

Divided we are always less

We all bring to the whole a part

Greater in its sum than in its division

We celebrate your being

Place our open faith in it

Trust that it will bind us

In joy, in sorrow -- through sharing

Thou art God -- peace be with you.
